

This feature will create a new dashboard for **Agency** users. This UI will provide a detailed breakdown of commission statements, allowing agencies to track earnings and reconcile payments against their **CommissionPlan**. The dashboard will be particularly useful for tracking financial changes resulting from an **AOR** (Agency of Record) change. It will provide a transparent view of **Commission Bill** items, payments, and reversals, pulling data directly from the agency's **Billing** account setup in **User Admin**.
